# TODO LIST BY CAROLINA ROMERO
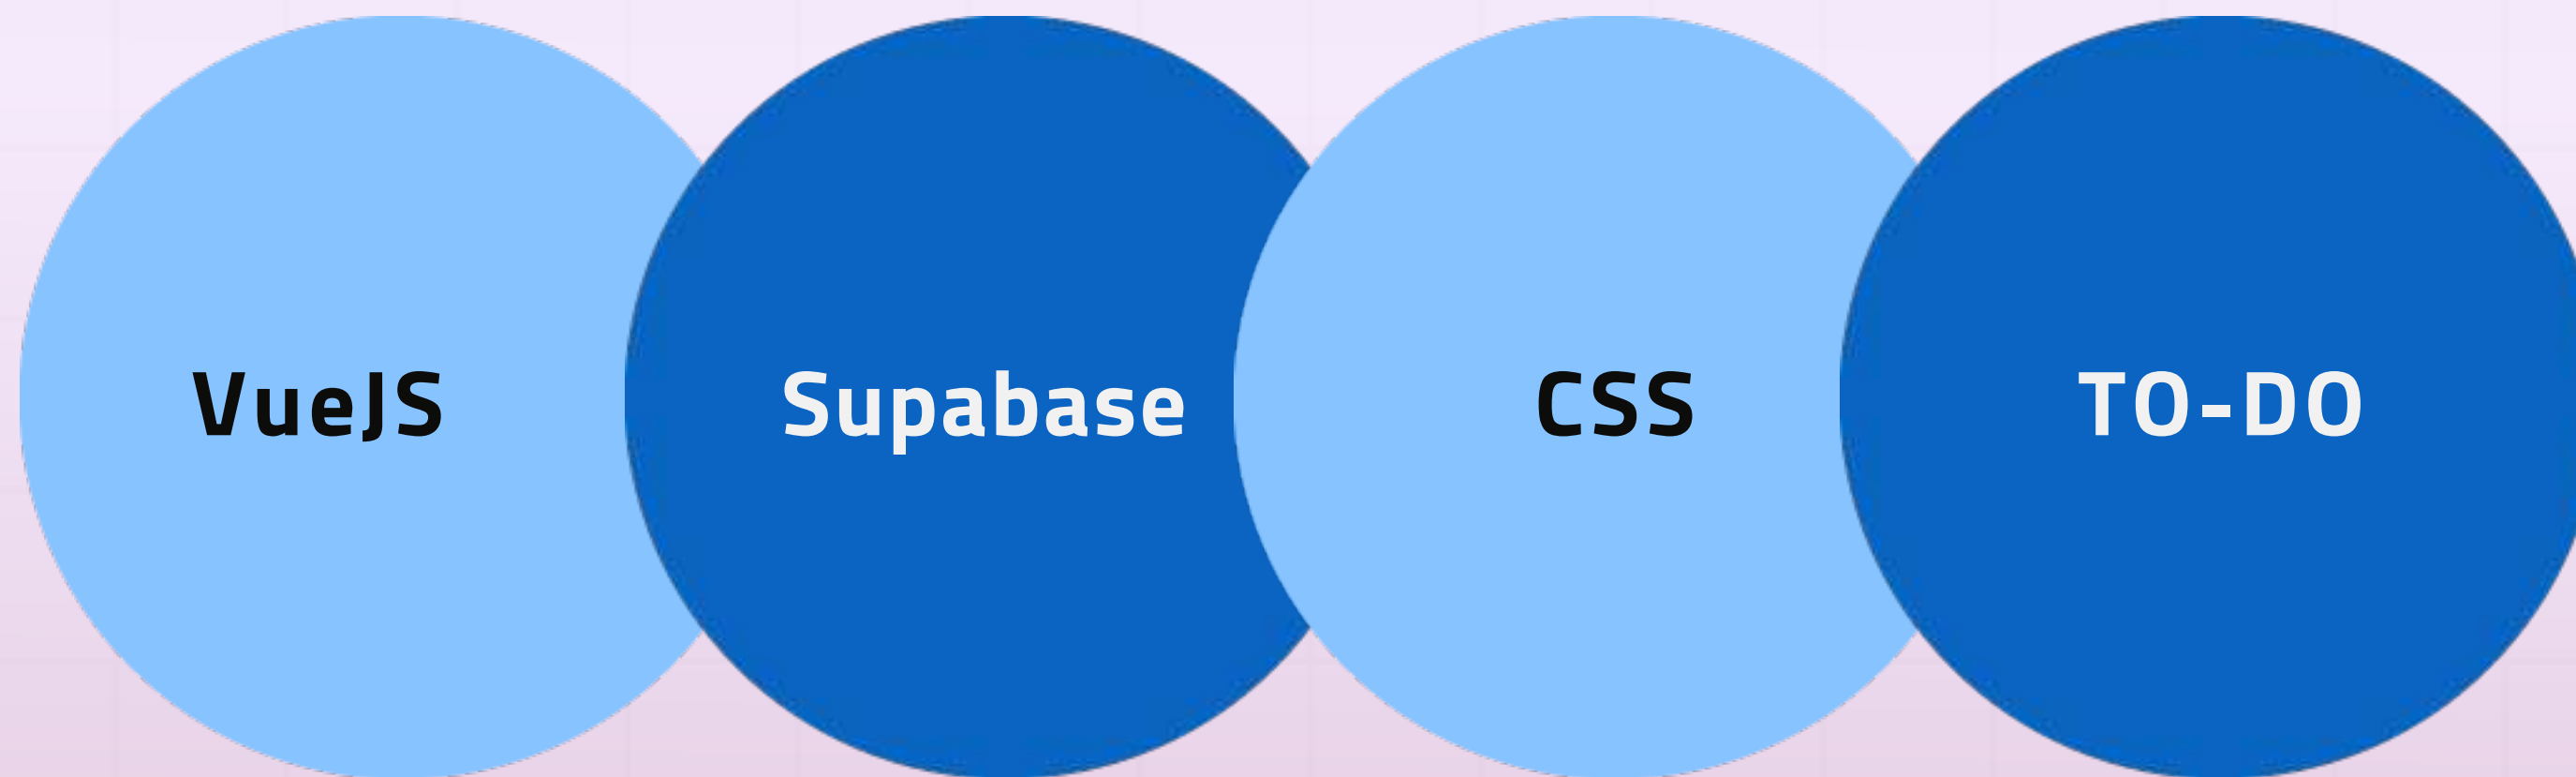

SOC – IronHack

GOALS!

In this project, I have applied all the knowledge acquired in the frontend course to develop a task app. I have managed to implement a responsive and pleasant design, connect to Supabase to authenticate users and retrieve or modify task and profile data, and use Pinia to manage states. It has been a challenge!

STACK AND FLOW

VueJS

Supabase

CSS

TO-DO

BREAKING POINTS

- Ref? storeToRef? WHAT?
- Where is my ID?
- Why did my component disappear?
- Seriously CSS?!

MY PROJECT

TO-DO List - App Vuejs

THANK YOU!
